

ECOBUST

NATURALLY INNOVATIVE

ECOBUST is an Expansive Demolition Compound for breaking rock or concrete without the use of explosives or jackhammering! It's powerful, safe, eco-friendly and completely silent. ECOBUST is *Naturally Innovative!*

CONCRETE CUTTING & DEMOLITION

- Concrete and Reinforced Concrete
- Equipment Pads, Foundations, Piers, Bridges, Beams, Retaining Walls, Pillars, Stair Wells, Drive Ways, Patios
- Do it yourself jobs, small and big

ROCK BREAKING

- Excavation, Boulder Breaking, Trenching, Rock Splitting, Leveling, Tunneling, Road Expansion.
- For any type of rock and strength.

MINING & STONE QUARRYING

- Granite & marble quarrying
- Controlled and safe breaking
- Reduce waste and damage to valuable stone associated with explosives
- Achieve perfect slabs of stone

ECOBUST is the ideal solution for both small and large jobs, when faced with environmental restraints, productivity demands, or when heavy plant or access is limited. ECOBUST provides safe, controlled demolition of rock or concrete without explosives, noise, vibration or dust. No licenses required.

Concrete Cutting and Demolition - Saves time and increases productivity

Controlled demolition of 4'X4'X 16" reinforced concrete pad

Rock Breaking - No blasting, No noise, No vibration

Breaking boulders, both big and small, in densely populated residential areas

Stone Quarrying - Controlled and safe, reduces waste and damage to valuable stone

Quarrying perfect slabs of Granite

PRODUCTS AVAILABLE

ECOBUST Box : Includes 4 bags (11lbs each)

ECOBUST Do-It-Yourself Kit *

*2 Bags, Bucket, Mixing Paddle, Measuring Cup, Goggles, Gloves, Dust Mask

WHAT IS ECOBUST?

ECOBUST is an Expansive Demolition Agent for safely breaking rock or concrete without the use of explosives or jack hammering!

ECOBUST is the fastest, most powerful & economical non explosive agent of its kind. It is eco-friendly, reliable and completely silent.

ECOBUST is made of a powdered mixture that when mixed with cold water and poured into pre-drilled holes, has an incredible 20,000 psi expansive power.

ECOBUST saves time and increases safety. Simply drill, mix, fill and watch it crack!

STEP 1

DRILL:

Always wear safety glasses & gloves. Drill holes with core or rock drill using a 1.50" drill bit (do not exceed 2.0"). Spacing of holes should be between 8-16 inches apart. The harder the rock the closer the holes. Drill between 80-90% of the depth. Clean out holes to remove excess residue and debris.
* Must have free space/edge for product to expand into.

STEP 2

MIX:

Choose the correct product type for your temperature. Pour 1.5 Litres of common cold water in a bucket and gradually add one 11lb bag. Mix either by hand (with rubber gloves) or use a paddle. Mix until the powder is completely dissolved in the water and becomes a slurry.

STEP 3

FILL:

Holes must be clean and free of water and residue. Pour product into pre-drilled holes within 10 minutes of mixing and fill to 1 inch from the top. Cover the holes with a tarp. Leave up to 24 hrs for best results. (Continues to expand for up to 48 hrs). TIP: Do not leave excess product in the bucket.

FILLS: 1 Box (44lbs) fills 35 linear feet of 1.5" diameter hole
BREAKS: 1 Box (44lbs) breaks approx. 4 cubic meters

ECOBUST

NATURALLY INNOVATIVE

EASY TO USE, SAFE, NON-EXPLOSIVE

NO DUST, NO NOISE, NO VIBRATION

REDUCES COSTS & SAVES TIME
